Trans. of Teploenergetika (USSR) 1955 (v. 2) no. 1,
p. 27-31.

Experimental results obtained by American research
workers (Hawkins, Solberg, and Potter) as to the
viscosity of steam are criticized; the reasons for their
mistakes in analyzing the results of their tests are
shown, and it is proved that their hypothesis that
viscosity is largely dependent on pressure is wrong.
